MORNING NEWS

SBP holds rate at 11pc for third time: (Economy: Positive)

Pakistan's central bank held its key interest rate steady at 11 percent for a third straight policy meeting, as flash floods threaten to deteriorate the inflation outlook. The State Bank of Pakistan (SBP) adopted a cautious stance, extending a pause in its monetary easing cycle amid concerns that deadly floods could trigger price pressures, particularly food inflation, and hamper economic recovery. The SBP said in the statement that the damage to crops from flooding is expected to further widen the trade deficit; however, this may be partially offset by improved market access to the US. Additionally, remittances have shown resilience and may increase further, as has been observed during previous natural disasters. The SBP expects the current account deficit to remain within the earlier range of zero to 1.0 per cent of GDP. With the anticipated realisation of planned official inflows, the SBP's foreign exchange reserves are projected to reach approximately \$15.5 billion by December 2025.

Pakistan's first-ever Trade Dispute Resolution Commission begins operations: (Economy: Positive)

Pakistan's first-ever functioning Trade Dispute Resolution Commission (TDRC) has formally begun operations under the chairmanship of Umar Dad Afridi. This marks the first time since the passage of the Trade Dispute Resolution Act, 2022 that the Commission has been fully appointed and operationalised with a defined roadmap. Operationalisation of the Commission would set new standards of transparency and professionalism in dispute settlement, thereby strengthening business confidence and Pakistan's credibility as a fair trading partner. Attracting Foreign Direct Investment (FDI) and boosting exports, they stressed, requires efficient dispute resolution. Yet for decades, Pakistan relied on the outdated Imports & Exports (Control) Act, 1950—a British-era law that confined trade disputes to costly and time-consuming litigation.

Small farmers and microfinance sector: Pakistan launches Climate Risk Fund-I: (Economy: Positive)

Pakistan has launched the Climate Risk Fund-I (CRF-I) under the World Bank-funded Resilience and Adaptation Mainstreaming (RAM) Project, to strengthen the country's most vulnerable farming communities and microfinance institutions against climate-induced shocks, particularly floods. In March this year, the World Bank approved USD102 million in financing for Pakistan under the Resilient and Accessible Microfinance (RAM) Project, which aims to enhance access to micro credit and support the resilience of the microfinance sector and its borrowers, particularly in the face of climate-related shocks. The SBP will manage this Fund under a Trust created by the federal government for this purpose. The CRF-I will provide financing to the eligible MFPs under two facilities, first Innovative Agriculture Liquidity (IAL) Facility and secondly Contingent Liquidity Facility (CLF). The IAL facility will provide financing to the MFPs to pilot agriculture loans bundled with agri-tech services for their borrowers to adopt climate resilient crops and cropping techniques and increase their productivity and resilience against climate shocks. Under CLF, eligible MFPs affected by floods will avail liquidity to restructure and top up their existing loans to the affected borrowers, and/or give new loans.
