MORNING NEWS

Most IMF targets met, \$1.2bn tranche approval likely in May: (Economy: Positive)
Pakistan has materialised 14 quantitative performance and indicative criteria out of the total 17 envisaged targets under the IMF programme for the end of December 2025. The FBR's tax collection target for the end of December 2025 could not be materialised, while for two other indicative targets, the relevant data was not available. The income tax revenues collected from the retailers could not be provided to the IMF, as the FBR had agreed with the IMF for collection of a hefty amount from retailers in the current fiscal year. The IMF staff has apprised the Fund's Executive Board and shared a detailed report on the basis of which the Executive Board is likely to consider approval of the fourth tranche worth \$1.2 billion in May 2026. The total accumulated spending on health and education stood at Rs1,360 billion by the end of December 2025, in line with the envisaged target of IMF.

First Central Asian shipment reaches Pakistan via China, bypassing Afghanistan: (Economy: Positive)
Pakistan has operationalised a new trade route connecting Central Asian states to its southern ports via China, an official statement said on Thursday, as the country received the first shipment of goods from Kyrgyzstan, a development that positions it as a regional transit hub while bypassing neighbouring Afghanistan. The development comes as ties between Pakistan and Afghanistan remain strained, with repeated border skirmishes and security concerns disrupting traditional transit routes. Landlocked Central Asian states have long depended on access through neighbouring countries, but Islamabad is now offering an alternative corridor through the Khunjerab Pass and Sost dry port. "Under the new route, Kyrgyzstan, Tajikistan, Turkmenistan, Kazakhstan and Uzbekistan will have direct access to Karachi port," Pakistan's state-run National Logistics Cell (NLC) said in a statement. "Pakistan has become a fast, secure and reliable trade corridor for landlocked Central Asian countries."

China praises Pak efforts for ME peace: (Economy: Positive)
Chinese Ambassador in Islamabad Jiang Zaidong Thursday expressed his country's appreciation of Pakistan's diplomatic efforts for lasting peace in the region. Shehbaz expressed his resolve to continue working closely with the Chinese leadership to further strengthen the bilateral relations. He expressed satisfaction over the positive trajectory of Pakistan-China bilateral relations and reaffirmed that Pakistan took great pride in its all-weather cooperative strategic partnership with China.

SBP forex reserves increase \$18m to \$15.1bn as of April 17: (Economy: Positive)
Pakistan's foreign exchange reserves held by the central bank increased by \$18 million to \$15.098 billion during the week ending April 17, the State Bank of Pakistan (SBP) said on Thursday. The country's total liquid foreign reserves rose by \$104 million to \$20.629 billion. The reserves of commercial banks also increased by \$86 million to \$5.531 billion. Pakistan has received \$3 billion in financial support from Saudi Arabia to bolster its FX reserves and offset a loan repayment to the United Arab Emirates (UAE). This new funding comes in addition to Riyadh's decision to roll over an existing \$5 billion deposit for a longer period. The country repaid \$2.4 billion to the UAE last week, fulfilling its debt obligations, while the remaining \$1 billion was due on April 23.

Mining gains traction despite Reko Diq delays: (Economy: Positive)

Pakistan's emergence in the global race for critical minerals is gaining traction. Backed by multilateral financing and large-scale mining investments, anchored by the Reko Diq copper-gold project, this shift is beginning to reshape the country's export profile and industrial landscape. An industry insider remarked that the pace of the mineral sector doesn't quite match the "adrenaline-fueled claims of the gentlemen boasting that the country will pick up pace by 2027 and will be standing among developed countries by 2030," instead, mining is following a natural course that will eventually benefit the entire economy. The Asian Development Bank (ADB) has signalled continued financial backing for Pakistan, including an approved \$800 million package comprising \$300 million in loans and \$500 million in guarantees, while officials indicate that additional financing of up to \$1 billion could be mobilised. The support reflects a broader push to position Pakistan within global supply chains for copper and other strategic minerals essential for energy transition, electrification and manufacturing. "Under ADB's approach for supporting critical minerals-to-manufacturing value chains, the bank approved an innovative financing package for a copper-gold mine in Pakistan to strengthen the global copper supply chain. ADB's financing will help unlock greater private capital by derisking the investment," the ADB Annual Report 2025 noted.

SBP allows banks to issue instruments for oil import contracts: (Economy: Positive)

The central bank on Thursday allowed commercial banks to issue financial instruments (FIs) during the registration of import contracts for crude oil and petroleum products, as well as standby letters of credit (SBLCs) to facilitate these imports, including liquefied natural gas, in response to geopolitical uncertainties, a circular said. This decision follows amendments made to the instructions regarding 'Imports under Pakistan Single Window (PSW) -- Financial Instrument Details' and 'Guarantees on behalf of Residents of Pakistan in Favour of Non-Residents' in the Foreign Exchange Manual. The conflict in the Middle East, a crucial global energy centre, has intensified concerns regarding instability in oil and gas markets, rendering nations such as Pakistan, which depend significantly on imported fuel, more vulnerable to price surges and supply disruptions.

Energy security: Timely steps helped avert potential crisis: PM: (Economy: Neutral to Positive)

Prime Minister Shehbaz Sharif on Thursday emphasised that energy security is a cornerstone of the country's future planning, stating that the government's timely conservation measures had averted a potential crisis amid regional instability. Chairing a high-level meeting on energy security, Sharif said the government was preparing a plan to maintain strategic crude oil reserves to meet the country's long-term energy needs. The prime minister also highlighted the need for a transition to eco-friendly transport, calling for a gradual shift to electric vehicles. He directed that all future government purchases of buses and motorcycles be electric and urged an accelerated rollout of charging infrastructure across the country.

Pakistan seeks three LNG spot cargoes in first tender since December 2023: (Economy: Neutral)

Pakistan has issued an urgent tender under amended PPRA rules for liquefied natural gas (LNG) cargoes as the country grapples with intensifying power outages amid supply disruptions and rising summer demand. The situation has hindered Pakistan's efforts to secure LNG shipments, including a planned arrangement with QatarEnergy, which declined to proceed due to security concerns. Officials said Pakistan had initially sought to procure four LNG cargoes from Qatar but failed due to the disruption. In response, the government has directed Pakistan LNG Limited (PLL) to float a tender for three LNG cargoes under revised procurement rules. Last time the PLL floated the tender for LNG procurement in January 2024, which it later cancelled. Now, according to the tender floated on Thursday (April 23, 2026), PLL is seeking international bids for three shipments of around 140,000 cubic metres each. The deliveries are scheduled for April 27-30, May 1-7, and May 8-14 at Port Qasim. Bids that are to be received before 2pm will be opened at 2.30pm on April 24, with authorities aiming to finalise contracts at 10pm the same day. The global LNG market remains volatile, with spot prices hovering around \$15.81 per MMBtu, while Asian spot rates recently surged to about \$16.05 per MMBtu—up roughly 54% since late February. The landed cost would include high premium, insurance cover and freight charges..

Pakistan plans up to 70,720MW power expansion by 2035 amid demand risks: (Economy: Positive)

Pakistan will require between 62,660MW and 70,720MW of additional power generation capacity by 2035 to support projected economic growth of 3.5 to 6.4 percent, according to the revised Indicative Generation Capacity Expansion Plan (IGCEP) 2025-35. The plan, prepared by the Independent System and Market Operator in consultation with the National Electric Power Regulatory Authority (Nepra) and other stakeholders, outlines a 10-year roadmap for expanding generation and transmission infrastructure across the national grid, including K-Electric. Based on three demand scenarios tied to GDP growth—3.52 percent (low), 4.95 percent (medium) and 6.37 percent (high) — the country's capacity addition needs have been estimated at 62,657MW, 66,459MW and 70,720MW, respectively. The projections reflect expectations of rising electricity demand driven by economic recovery and industrial growth.

Early shop closures wipe Rs200bn off economy in two weeks: CAP: (Economy: Negative)

The Chainstore Association of Pakistan (CAP) has called for an urgent review of early retail closing hours, warning the policy has already led to an estimated Rs200 billion loss in economic activity within just two weeks of implementation. In a formal appeal to federal and provincial authorities, the association said enforcing an 8pm closing time across much of the country is disproportionately affecting the organised, tax-compliant retail sector while delivering limited energy savings.

Duties on used phones hiked by 175%: (Economy: Neutral to Negative)

The federal government has increased customs valuation on used imported mobile phones by up to 175%, making 62 models from various companies more expensive, according to a document available with The Express Tribune. The Federal Board of Revenue's (FBR) Directorate General of Customs Valuation has issued a new customs valuation ruling for imported mobile phones, stating that taxes will now be collected based on these newly set values. Officials said the increase in customs valuation will raise the amount of tax imposed on used imported phones. Following the tax increase under the new valuation ruling, 62 models of various well-known brands have become more expensive. The new law will apply to all used phones, regardless of their condition. Imported phones must have been activated at least six months prior to shipment. Importers will be required to provide details of phone activation, which will be verified by customs officials.
